Almond Granite

Description

Warm-toned with a peachy base, it strikes gold when toning with and complementing anything brick. Almond is gentle and comforting and is here to help!

Why choose Almond Granite?

Almond Granite is dense and durable and is very resistant to staining. Its lovely warm colour tones make it ideal for use in both traditional and modern settings. Almond is very cool underfoot compared to darker colours. It is highly non-slip. The tiles are accurately sized, cut well and are easy to lay. There is a varying quantity of yellow flecks from tile to tile and the tiles may display some grey patching and veining. Almond also contains a small amount of mica which sparkles in the sunlight. Each batch may have Mushroom tiles in the mix.

Finish

Bush Hammered

Maintenance

Minimal. Seal with penetrating sealer to make cleaning easier. The surface can get brown marks on it early in its life. This is easily removed and will not continue past the short term.

Slip Rating (Wet Pendulum)

This tile has a P5 slip rating in the (V) pendulum classification which is the highest wet pendulum rating available under the current standards. (For pool surrounds, a minimum of P4 is required.)
