Silver Shadow Limestoneio

Description

Elegant, durable and low-maintenance, Silver Shadow Limestoneio® offers the refined look of classic grey limestone, combining the beauty of limestone with the resilience of porcelain for a timeless outdoor finish. The soft grey palette and subtle tonal movement of Silver Shadow Limestoneio® creates a sophisticated backdrop for pools, patios and landscaped areas. Crafted from premium porcelain, Silver Shadow Limestoneio® is highly resistant to stains, fading and weather exposure, ensuring a long-lasting finish with minimal upkeep.

Why choose Silver Shadow Limestoneio®?

Silver Shadow's porcelain tiles are hard, dense and durable, making them very resistant to staining. What's more, the colour variation in the tiles hides marks in between cleans. They are sold with a non-slip finish which is rated P5 making them ideal for use around swimming pools and outdoor areas. The surface finish is comfortable on the skin and gentle enough for swimming costumes. The tiles are accurately sized, cut well and are easy to lay. Silver Shadow Limestoneio® is ideal for projects requiring a classic, upmarket appearance utilising cool tones.

Grip

Maintenance

Minimal maintenance is required. These tiles do not require sealing. Porcelain's dense surface absorbs very little moisture, so spills that might seep into another material and cause a stain, can easily be wiped up with a damp cloth or hosed off. Flax Travertino generally only needs to be swept and cleaned with water and a mild detergent regularly. It is the perfect material for those who want a quality natural stone look with very little effort.

Porcelain tiles do not need sealing due to having little to no porosity. However, some people choose to seal their porcelain, as there is no doubt it makes cleaning easier. Sealing will especially assist with the cleaning of the grout. After sealing their porcelain, some customers have told us that they even vacuum their tiles!! Please ensure you use an appropriate 'porcelain specific' penetrating sealer. We recommend seeking assistance from John from Stone Clean and Seal for advice.

Slip Rating (Wet Pendulum)

This tile has a P5 slip rating in the (V) pendulum classification which is the highest wet pendulum rating available under the current standards. (For pool surrounds, a minimum of P4 is required.)
