

SS017 Black Quartzite

Panel Size

550x150mm

Draw an exclamation with this elegant ebony-black quartzite stacked stone. More refined than other black wall cladding counterparts, the long and thin format of the stone segments makes it ideally suited to lower walls, pillars and interior wall features. With so many modern homes and renovations featuring tasteful black accents, this charming cladding is often the perfect choice.

Like a favourite black pen, Black Quartzite Fine stacked stone wall cladding will make a fine mark.
